- In the Admin side – Added the functionality of Add, delete and Update the Restaurant. That can be only be managed by the Admin only.

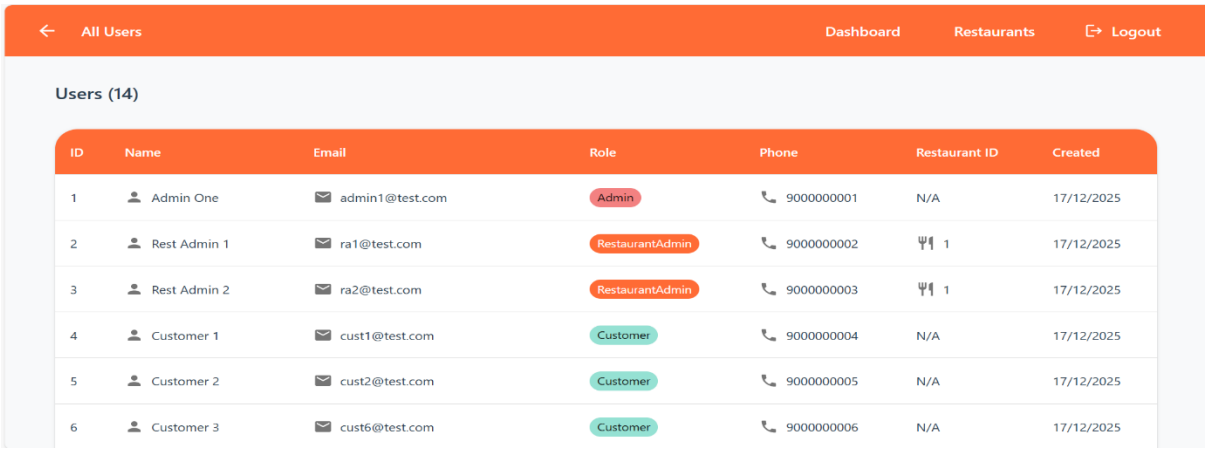

- Added the InBuilt UI for the project.

  → For Now, Added the Differently for Customer side and Admin & Restaurant Admin side.

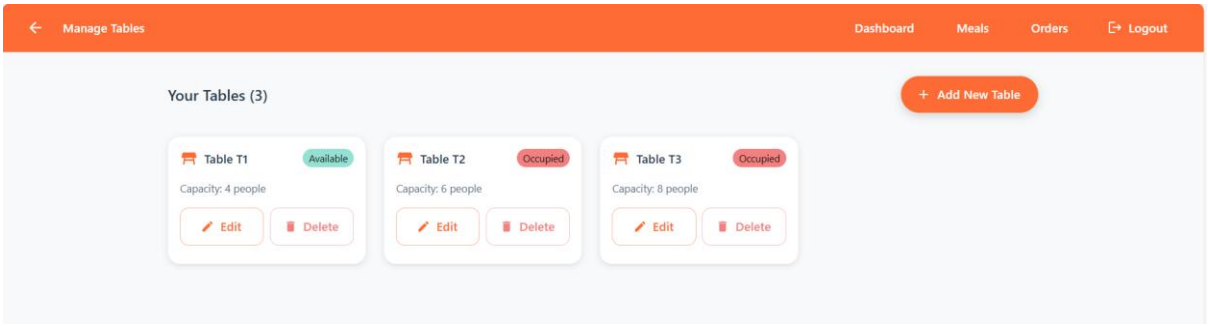

→More images for the UI and some graphics for example only….

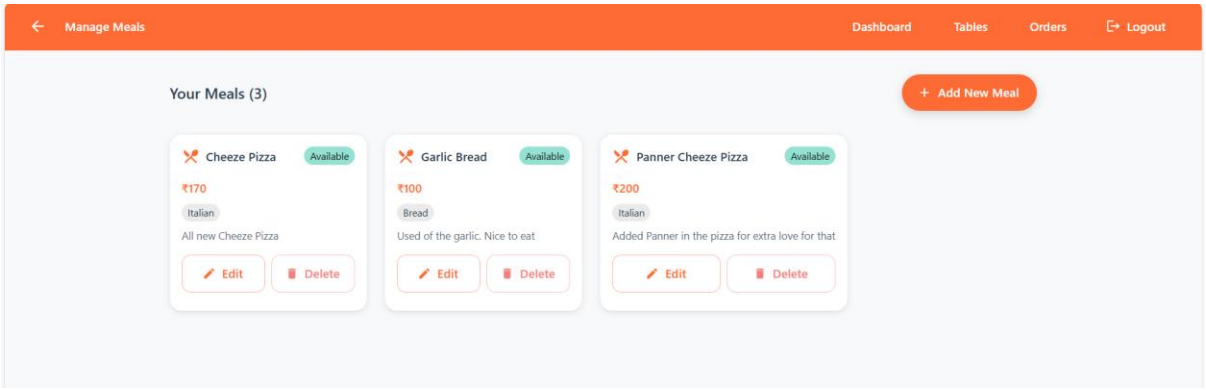

Restaurant Admin Side:-

Table:-

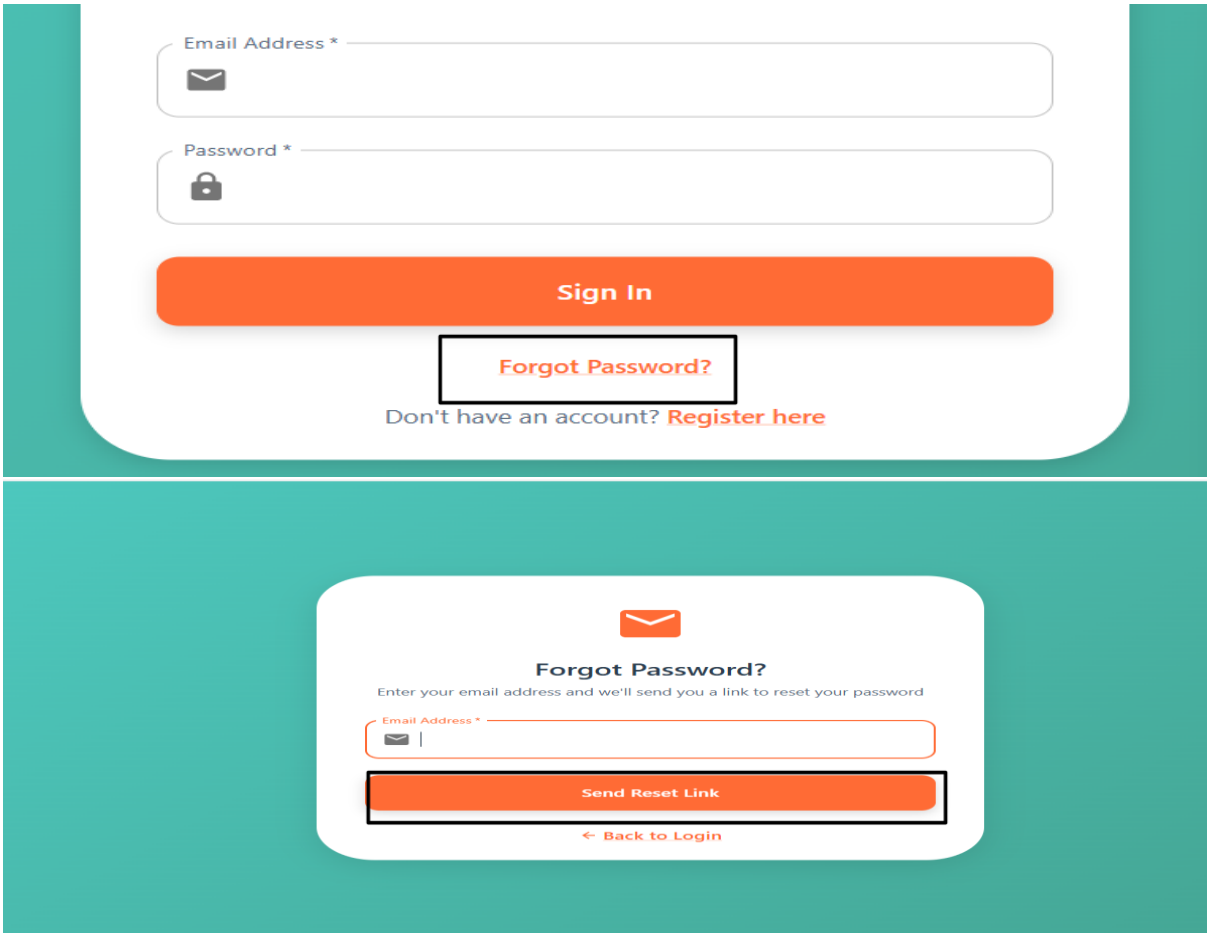

Meal:-

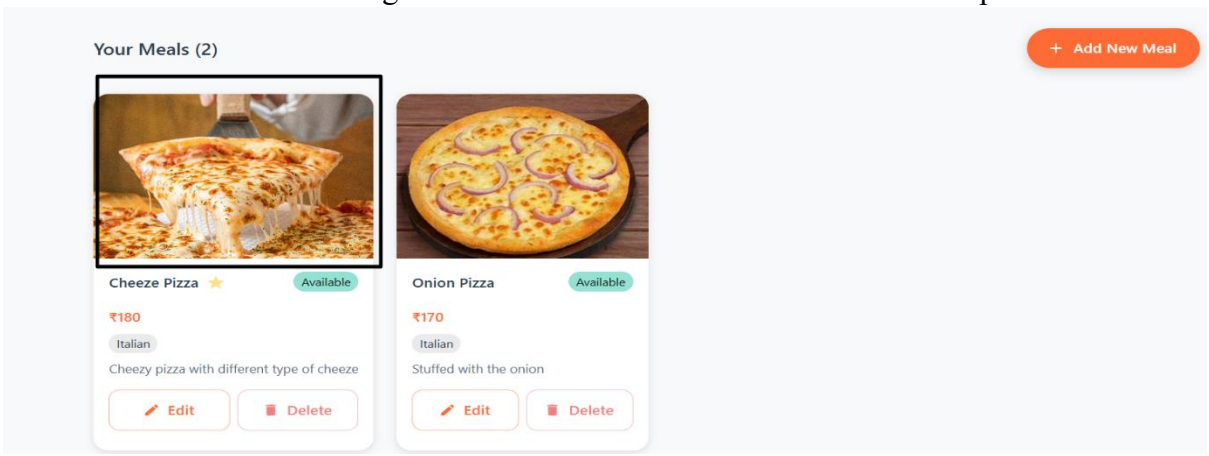

23-12-2025

- Added the functionality of the Forgot Password.
- Based on this reset password will happen on the Email address of that admin/user.

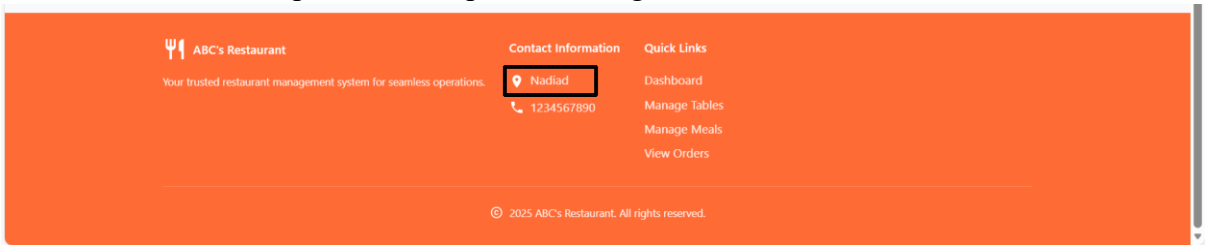

- Added the features of the image in the meals. So that it can be viewed more precise.

24-12-2025

- In this Added the features of the footer in the restaurant admin side, where it can see the basic details such as name, address contact etc things.

- In this, Location will open in the maps on clicking on that location.

- And some changes also has been done.

26-12-2025

- Added the customer footer in the Customer side. Where they can see the restaurant details etc things.
- And make some of the changes were required in this.
